Response to OA 8-11-04

### REMARKS

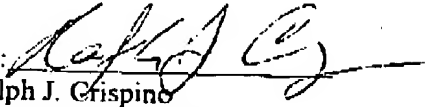

Applicants wish to thank the Examiner for the attention accorded to the instant application.

With respect to the Examiner's first objection to the disclosure, the title has been amended. With respect to the Examiner's second objection to the disclosure, it is respectfully submitted that the description of the Figure is present at page 2, lines 4-5.

With respect to the Examiner's rejections of claims 1-7 based on 35 U.S.C. §102(e), it is respectfully submitted that the present claims are different that what is disclosed in Kleinberger et al. U.S. Patent No. 6,252,707 (Kleinberger). The Examiner asserts that the band as used in claim 1 hereof is anticipated by col. 27, lines 9-13 of Kleinberger. However, element 20, which is expounded upon in the cited section, is divided light polarization means, as opposed to a band surrounding the display system and having one or more polarization filers attached to or integral therewith.

The amendments herein do not introduce any new matter. It is believed that the claims herein should be allowable to Applicants. Accordingly, allowance is respectfully requested.

Respectfully submitted,

By:
